User Login

 - Register
 - Fitness Blog
 - Diet Planner
 - Fitness Videos
 - Payment and Subscription

Algorithm.

- Step 1 - Start the application
- Step 2 - Display the User Login or Register button
- Step 3 - When the user is new, he will click on the register button and fill in the details including email, password and username
- Step 4 - If the user has an account already, he will click on user login and give his email and password for secure verification.
- Step 5 - After verification, the user details are stored in a database.
- Step 6 - After getting inside the app the user can either view Health Routine Blogs or Self-Care Blogs
- Step 7 - If the user clicks on Health Routine Blogs he will see the content regarding that and same for self-care Blogs
- Step 8 - The user can quit the Blog by clicking on the homepage.
- Step 9 - And to quit the entire application the user will log out
- Step 10 - Stop the application :

Pseudocode :

START

DISPLAY :

- 1. User Login
- 2. Register.

IF USER == New

INPUT in REGISTER

1. Name.
2. Age.
3. Email
4. Password.

"Registered Successfully"

If USER == OLD.
Input in login

1. Email
2. Password.

"logged in"

DISPLAY if login successful:
1. Health Routine Blogs
2. Self-Care Blogs

If choice == 1

Display Health Routine Blog. (What to do and what not to do concerning our health)

Else if choice = 2.

Display Self-Care Blogs (Skincare, Body Care, and mental Care routine for peaceful life)

Else.

Move to Dashboard.

END IF.

DISPLAY if login not successful:

"Try Again, invalid credentials".

LOGOUT.

STOP

2. Algorithm

Step 1 - Start the application

Step 2 - Display the user login, where the user will input his name, age, email and password.

- Step 3 - Verify the credentials and check the authenticity of the account.
- Step 4 - Once inside Show the users to select a subscription and register for it.
- Step 5 - After Registering for the subscription, store all the related information in a database for efficient storage.

- Step 7 - As Display Resume Upload and choose jobs to the user
- Step 8 - The user has to upload their resume and also Choose the preferred mode of job and type of job.
- Step 9 - The application will provide all the related job.
- Step 10 - The user can choose the job they want and submit their application
- Step 11 - The user can then logout.
- Step 12 - Stop the application.

Pseudocode:

START:

DISPLAY

1. USER LOGIN.

If user clicks user login

Input Name

Input age

Input email

Input password

Input Username.

If login is successful

DISPLAY:

1. Register Subscription

2. Personal Detail
3. Resume Upload.
4. Choose a job.

If Input choice .

If choice = 1.

- Input choose subscription.
- pay for it .

Else If choice = 2.

Input all personal details including

Name

Age

Nationality

Preferred City

Qualification .

Else If choice = 3 .

upload Your Resume .

Else If choice = 4

Choose a job .

Else Logout .

END IF .

ELSE .

"login was ~~enter~~ unsuccessful."

END IF .

LOGOUT

STOP.

2. 3. Algorithm .

Step 1 - Start the application

Step 2 - Display the user login.

Step 3 - If the user clicks on login , he will click on the email and password .

the application

- Step 4 - The application will verify the credentials and securely store it in the database.
- Step 5 - After getting inside the app, the user is shown a list of buttons → Register count of Empty parking, Free Parking slots and Booking the slots.
- Step 6 - If the user clicks on either of the buttons, the contents regarding that will be generated.
- Step 7 - If the user wishes to get out of the app then he can logout.
- Step 8 - Stop the Application.

Pseudo code

START.

DISPLAY

USER LOGIN.

If user clicks on User Login

Input Name

Input Email

Input Mobile No

Input Password.

If login = "Successful"

DISPLAY:

1. Count of Empty Parking
2. Free Parking slots Display
3. Booking Parking Slots.

Input choice.

If choice = 1

Display the count of empty parking spots.

Else If choice = 2.

Show the free parking slots.

Else If choice = 3
Book the parking slot.

Else
"Pass"
END IF

Else

Login ✗ Successful.

"Not valid, Try Again"

END IF

LOGOUT.

STOP.

4. Algorithm.

Step 1 - Start the application.

Step 2 - Display the user login to the user to get inside the app

Step 3 - When the user clicks on it, he is prompted to fill in the email, the password, his name and mobile number which will be securely verified.

Step 4 - After verification all the details are stored in a database for future use and to reduce typing the same thing over and over again.

Step 7 - For the subscription, the user has to select an appropriate tier of subscription and pay for it through secured gateway.

Step 8 - The user can logout and exit the app

stop the application

Pseudocode :

START.

DISPLAY

1. User login
2. Register.

If user = New

Input in Register.

Name

Mobile No

Email

Password.

Username.

If User = Old.

Input in Login

Email

Password.

If login = Successful

Display :

1. Fitness Blog
2. Diet Planner
3. Fitness videos
4. Payment & Subscription.

Input choice .

If choice = 1

Display content by famous influencers regarding fitness

Else if choice = 2.

Plan a diet for the user based on their goal.

else if choice = 3.

Display fitness related videos to the user.

else.

Choose a subscription tier

pay for the chosen subscription

Endif

Else .

login $\neq$ Successful

" Invalid Credentials " .

END IF .

Logout

STOP
